

### *Testimonial - Naturally Green*

My wife & I moved to Orange in 2003 & were keen to turn our barren house block into a garden as soon as possible.

Being new to the area we approached several landscapers & the one that impressed us most was Mick Curran from Naturally Green. Other landscapers we approached fail to keep appointments while others showed a remarkable lack of interest.

In contrast, Mick demonstrated a high degree of professionalism from the start, particularly with suggested garden design alternatives, plant use & a realistic time frame for completion and costing.

As our initial contact with Mick & Naturally Green was most positive, we have used their services exclusively in a wide range of areas over the past 8 years. These include a major redesign of our front garden requiring a complete excavation, installing in-ground irrigation, construction of retaining walls, establishment of garden beds & preparation & laying of turf.

On other occasions Mick & his team have demonstrated their wide & varying range of expertise including the preparation & laying of paving tiles completed to their customary high standard.

In our opinion, Mick Curran is a true professional, always contactable & readily available to assist with any problem in the garden.

We have no hesitation in recommending Mick & his Team at Naturally Green for any landscaping & associated work.
